ACHIEVEMENT

Fundamental Of Cloud Computing Hands-on lab for certification Google Cloud Platform (GCP)	2024
Fundamental Of Power BI Examination for Certification of Power BI	2024
Workshop 2 - House Rental Management System (DreamHouse) Platinum Reward For Competition Workshop 2	2023

CERTIFICATION

Master Laravel 12 & PHP: From Beginner to Advanced Udemy	2025
Google Cloud Computing Foundations Certificate Google Cloud Skill Boost	2024

PROJECT AND COURSEWORK

Tourism System | *Legal Intern*

- Developed key modules for F&B package and booking management using Laravel and Livewire, integrating both backend logic and frontend interfaces.
- Designed and implemented a responsive portal with interactive UI and animation for an improved user experience.
- Built dynamic admin functionality to manage F&B item sets and package configurations efficiently.
- Applied validation handling and error messaging to ensure data accuracy and user input reliability.
- Enhanced code structure by modularizing components and optimizing logic for better performance.
- Language : PHP, Laravel, HTML, CSS, Javascript, Livewire
- DBMS : MySQL

House Rental Management System (DreamHouse) | *FYP I & FYP II*

- Developed a House Rental Management System enabling landlords to register their properties and agents to manage rental contracts.
- Implemented online payment functionality for tenants and automation of the database.
- Included admin roles for overseeing all aspects of the rental process and a dashboard for monitoring income and other key metrics.
- Language : PHP, Laravel, HTML, CSS, Javascript
- DBMS : MySQL

ABC-Adventurous (Kids e-Learning) | *Multimedia Database*

- Developed ABD-Adventurous, a comprehensive kids' learning system featuring interactive alphabet booklets with pronunciation sounds, educational videos, quizzes, progress tracking, and a Kid's TV section with curated YouTube videos.
- Implemented an advanced alphabet detection feature using image recognition technology for interactive learning experiences.
- Language : PHP, HTML, CSS, Javascript, Python
- DBMS : MySQL

Restaurant POS System | *Object Oreinted Programming*

- Developed a Restaurant POS system focusing on order management, reporting, and staff management to enhance operational efficiency and decision making.
- Language : Java
- DBMS : MySQL

SKILL
